

## Filter Replacement - Hyundai 550R

You can turn off the water supply from at either A or B

### Step 1

Unplug Bidet from the power point and turn off the water supply

### Step 2

Place screwdriver between filter and the ring extending from the elbow

### Step 3

Push elbow off with screwdriver

### Step 4

Push off other elbow

### Step 5

Remove old filter and place in recycle bin

### Step 6

Push fittings onto new filter making sure arrow on side of filter is pointing towards Bidet

For optimal performance of your Hyundai Bidet, the filter should be changed every 6-12 months.
